

**AUTHORIZATION PROCESS AND
TECHNICAL CRITERIA/QUALITY ASSURANCE
FOR DRINKWARE**

1. AUTHORIZATION PROCESS.

- (a) Company must authorize, in writing and before the manufacture, sale or distribution of Products commences, all Products, including all graphics, as set forth in The Coca-Cola Company's ("TCCC") Global Quality Procedures and Packaging Authorization for Trademark Vessels ("TCCC Quality Manual") for Products authorized for use outside of the USA, the Coca-Cola North America Vessel Authorization Procedure Manual (the "VAP Manual") for Products authorized for use within the USA, or such other prerequisites as may be required by TCCC and its designated Operating Group (collectively, "Company") and communicated in writing to Supplier by Company. Both the TCCC Quality Manual and the VAP Manual are incorporated herein by reference and made a part hereof. Company will provide Supplier with a copy of the TCCC Quality Manual and/or VAP Manual, as applicable, upon Supplier's request. Supplier must comply with TCCC's procedures for applying for Authorization (including, but not limited to, technical and graphics approval) and shall submit to Company for Company's written Authorization or acceptance, at Supplier's expense:
1. Copies of all concepts and artwork that may be developed involving any of the Trademarks Supplier proposes to use on or in connection with each Product.
 2. A production quality sample of each proposed Product on which any of the Trademarks are to be displayed.
 3. Copies of all material Supplier intends to use in the merchandising of the Products, including all advertising and promotional materials. Supplier agrees not to publish or use any advertising, sales, promotion, or publicity material on which the Trademarks or graphics of TCCC are displayed, or the names of TCCC, its subsidiaries, Affiliates and/or its authorized bottlers are mentioned or their identities implied, without the prior written consent of TCCC.
 4. Any proposed change in artwork or advertising or promotional material for the Products.
 5. Copies of any other material prepared by or for Supplier containing a reference to Company or to any of the Trademarks.

All materials submitted to Company may be retained by Company.

- (b) If any of the Products are authorized by Company for a specific, limited promotion, Supplier acknowledges and agrees that Company must approve any additional production, manufacture, sale, distribution or delivery of such Products, including unsolicited requests for the Products, prior to accepting any such order or request, which approval is in Company's sole discretion.
- (c) Supplier must obtain Company's approval for any proposed solicitation of Products prior to Supplier making any such solicitation(s). Supplier shall not present any promotional concepts involving use of the Trademarks to any purchaser or potential purchaser of Products without first obtaining Company's approval of the promotional concepts.
- (d) Under no circumstances will Products for which written Authorization has not been given by Company be deemed authorized. No verbal authorizations shall be given or relied upon.
- (e) If Supplier commences manufacture, distribution, or sale of any Product without complying fully with this Authorization Process and Technical Criteria/Quality Assurance policy, Company may immediately terminate Authorization of the Products and immediately terminate the Supplier's Authorization Agreement between TCCC and Supplier by providing written notice to Supplier

and, in addition to all other remedies available to it, Company will have the right to injunctive relief to prevent Supplier from engaging in such manufacture, distribution, or sale.

- (f) Any Authorization granted by Company under this Authorization Process and Technical Criteria/Quality Assurance policy extends only to Supplier's use of the Trademarks and does not release Supplier from any other responsibility it may have to Company, an Authorized Purchaser, or any Third Party.

2. TECHNICAL CRITERIA/QUALITY ASSURANCE.

- (a) Prior to Company granting final approval of each of the Products, Supplier, at its expense, will provide passing quality and safety test results of production samples from an independent laboratory approved by TCCC's Worldwide Licensing Department (or from an in-house laboratory approved by TCCC's Worldwide Licensing Department), and will comply with all requirements of the TCCC Quality Manual and/or VAP Manual, as applicable, or such other requirements as may be required by Company and communicated in writing by Company to Supplier. A copy of independent laboratories approved by TCCC's Worldwide Licensing Department is attached to this policy.
- (b). If, after Company grants final approval with respect to any of the Products, Company decides, in its reasonable business judgment, that such Products present a risk of injury to consumers, then Company has the unconditional right to withdraw its approval and require Supplier to recall immediately, and at Supplier's expense, all of such Products from the marketplace.
- (c) TCCC's quality and safety testing requirements do not release Supplier from any responsibility to Company, an Authorized Purchaser, or any Third Party with respect to the quality or safety of Products.
- (d) If Company decides, in its reasonable business judgment, that any of the Products should be recalled, Company has the unconditional right to withdraw its approval and require that Supplier immediately recall all such Products from the marketplace. If Company's decision to recall is a result of quality or technical difficulties with the Products, a breach of any warranty of the Supplier's Authorization Agreement between the Parties, or a breach of these Technical Criteria requirements, Supplier shall bear all expenses associated with such recall and reimburse Company's total out-of-pocket expenses incident to the recall which would not have been incurred but for the recall. If Company requests that Products be recalled absent any quality or technical difficulties with the Products or not as a result of a breach of any warranty of the Supplier's Authorization Agreement or these Technical Criteria requirements, Company shall reimburse Supplier for Supplier's total out-of-pocket expenses incident to the recall which would not have been incurred but for the recall.

Capitalized terms used in this "Authorization Process and Technical Criteria/Quality Assurance for Drinkware" policy shall have the respective meanings given them in the Supplier's Authorization Agreement between TCCC and Supplier.
