The above information applies only to bottled and canned products and not to those served from a fountain dispenser. Every product contains 0 grams protein. Values are rounded to the nearest whole number. Values listed in this table may differ from those declared in the Nutrition Facts panels on packaging labels due to rounding rules required by the Food and Drug Administration (FDA). In addition, values listed in this table are per an 8 fluid ounce (240 mL) serving, which FDA requires as the reference amount for these beverages. Consequently, these values will differ from those declared in the Nutrition Facts panel on cans. FDA requires the nutrition information for beverage containers of 12 ounces or less, including cans, to be based on a serving size equal to the net contents of the package rather than 8 fluid ounces.
